Subject: 7/11/24 Agenda item 4 Horse Ranch

Message: SAE stands for supervised agricultural experience. In order to be in FFA you have to complete one of these. I'm Jaedyn Miller, or exhibit Q, a former FFA greenhand and chapter officer. One of my projects was horse husbandry at 4Horse Ranch. I have logged my hours, had my agricultural project leader complete progress visits, & been approved by the National Council for Agricultural Education. I have been under guardianship with the 4Horse Ranch family for quite some time now. I am soon attending UC Davis and their Division 1 Equestrian Team. Without this ranch, I could not be going in this path or have any of the skills I need to further my career. It has opened a safe place for me to go to, not only during hardships but also to learn and grow. Jason Freeman and his family are attacking this safe space. Freeman has made many lewd remarks to me personally, about threatening to hit horses or dogs, sped up when he sees children in the road, and has been overall hostile and nasty. We all know of their cars by now and attempt to avoid them. Many times he has been caught taking photos, whether this be for legal reasons or his personal sake I am not sure of - regardless, as a minor this made me and my peers very uncomfortable. It always felt as though they were leering, and now that I have turned 18 I feel comfortable speaking on this. In regards to that, I would like to remind whomever this concerns that this isn't just a property, but someone's home, somebody's safe place. How would you like it being constantly attacked and watched in your home? This is a rural area and the opposite of why people move to a place like Calaveras.
